Technical Projects

Freelance Marketplace website

- **Technologies Used:** HTML, CSS, JavaScript, ReactJS, ExpressJS, NodeJS, MongoDB, Postman, Netlify, Render.
- **Description:** Developed a fully functional Role Based Access Control Freelance Marketplace website using the MERN stack. The platform allows freelancers to showcase their skills, connect with clients, and manage projects efficiently. Implemented key features include user authentication, freelancers post their works, a secure payment system, real-time messaging, and a review system. Focused on delivering a seamless user experience through responsive design and optimized backend APIs. The project demonstrates expertise in full-stack development, emphasizing collaboration, scalability, and a user-centric approach
- **Outcome:** Gained proficiency in React component-based architecture and CSS for maintainable styles.

Personal Portfolio

- **Technologies Used:** HTML, CSS, Bootstrap.
- **Description:** Designed and developed a responsive personal portfolio website using HTML and CSS to showcase my projects, skills, and experience. Built a structured and visually appealing UI with Bootstrap for styling and responsiveness. Implemented key sections such as Navbar, Dashboard, Resume, Projects, and Contact for seamless navigation. Ensured **cross-**device compatibility and optimized performance for a smooth user experience. Deployed the website on Netlify for easy access and fast loading speeds.
- **Outcome:** Gained hands-on experience in HTML and CSS for building responsive web designs. Improved my skills in UI structuring, layout design, and styling.
